In 1988, Dietrich used MRI to show that developmentally delayed children had alterations in their myelin. Coulter described that central nervous system damage can be exhibited as abnormal behavior of the child. In 1935, Thomas Rivers, experimental allergic encephalitis (EAE) can be the result of a viral or bacterial infection of the nervous system. "The fact of the matter is that it is a matter of record that it was known that vaccination produced encephalitis since 1926." The authors stated, "In regions in which there is no organized vaccination of the population, general paralysis is rare. ... It is impossible to deny a connection between vaccinations and the encephalitis (brain damage) which follows it." Vaccines have been linked to seizures, convulsions and epilepsy. Ehregut W at Institute of Vaccinology and Virology, Hamburg, Germany states, "Bias in the evaluation of CNS complications following pertussis immunization are the following: 1) Notifications of post-immunization adverse events, 2) Publications by vaccine producers on the frequency of adverse reactions, 3) Comparison of permanent brain damage after DPT and DT immunization, 4) Pro-immunization, 5) Immunization associated viral encephalitis, 6) Accuracy of statistics, 7) Personal. A review of these points indicates an underestimation of CNS complications after pertussis immunization."

Injection of DT.TAB Vaccine, Prese Med, Sept 15, 1984, 13(3):1900. Vaccines: The Weird, The Wild and
The Hilarious Citations: Sometimes there are articles published about the strangest facts related to
vaccines that defies our imagination and ability to understand them. They were written seriously by
well-meaning scientific persons, but their titles can be seen differently. Some are funny, some are sad
and some are purely scientific folly. See if you can figure these out:

Pathel, JC, et al, "Tetanus Following Vaccination Against Small-pox", J Pediatr, Jul 1960; 27:251-263.
[Now you need a tetanus vaccination!]

Favez, G, "Tuberculous Superinfection Following a Smallpox Re-Vaccination", Praxis, July 21, 1960;
49:698-699. [Super means large/big/great!]

Bonifacio, A et al, "Traffic Accidents as an expression of "Iatrogenic damage", Minerva Med, Feb 24,
1971, 62:735-740. [But officer I was just vaccinated!]

Baker, J et al, "Accidental Vaccinia: Primary Inoculation of a Scrotum", Clin Pediatr (Phila), Apr 1972,
11:244-245. [Ooops, the needle slipped.]

Edwards, K, "Danger of Sunburn Following Vaccination", Papua New Guinea Med J, Dec 1977,
20(4):203. [Are vaccines phototoxic?]
